

## *Hawk-i Version 5.3.0.1*

### *Release Notes*

Hawk-i is a DICOM viewer and utility software designed for viewing multi-modality medical images especially for cardiovascular multi-frame images, such as DSA, Echo, OCT, CTA, MRI...

### *What's New*

A few of the features new to this release include:

- DICOM Self-play CD burning function Improvements:
  - Enable image selection and private patient information editing.
- Enable mouse panning.
- Smart-Zoom function improved image quality and zooming from X0.1 to X5.0.
- Add “Load Factory Setting” button in setting dialog.
- More stable and faster
  - With every release, Hawkie works to make Hawk-i more stable and faster.
- Other Bug Fixes
  - For brevity some small improvements and bug-fixing are not reported.

### *Install and Uninstall*

Once you have gotten the Hawk-i newer setup binary, just run the setup simply. If you prefer to install old version of Hawk-i, please uninstall it beforehand .

To uninstall Hawk-i, simply run Start-All Program-Hawkie-Uninstall
